

# TAKE CONTROL OF YOUR RTK CORRECTIONS AND YOUR COSTS OF OPERATION

## Many Options for success and control of your RTK Signal

- From Office to Tower- Wireless.
- From Tower to Field- Wireless- can choose many options, 900, 450. or 2.4, or we can run direct on all tractors. The intention of this design is to ensure correction is available where cell coverage may be less than ideal. Works with radios already on the farm.
- Mobile base setup can supplement any holes based on terrain or distance, can be tripod or vehicle mounted.
- Using CORS, only states that allow this type of connection, When using CORS, this is for your use, no resale of CORS signal is allowed.
- This system works with any brand RTK.

RTK connectivity solutions available now
